Twist the throttle grip to IDLE position or slower. If your engine doesn't start after three pull, push the choke knob in and repeat the starting procedure. DO NOT shift the engine into FORWARD or REVERSE while it is shut OFF. Loosen the lock nut, take off the NSI cable from the bracket, and separate the end of the cable from the cam. 1. NEUTRAL Remove the engine cover. 1. Lock nut 2. Cam Lift off the recoil starter assembly. Tie a knot in one end of the emergency starter cord. Pull up on the tilt lock lever. Slowly lower motor to its normal operating position. When using the shallowwater drive bracket, the tilt lock feature will not work. Operate your motor in FORWARD and ONLY at slow speed. DANGER 2 Remove the plug from the flushing port. 3 Install flushing device and garden hose. 4 Cover the water intake hole with tape. DO NOT run the engine indoors or without 5 Place the shift lever in NEUTRAL with the adequate ventilation or permit exhaust. Refer to Flushing. If your trailer does not provide adequate road clearance, the motor can be trailered by using an accessory trailering bracket. See your Dealer. DO NOT use the tilt lock lever when trailering. IMPORTANT Whenever using an accessory traile ring bracket, the motor must be

restrained. If you must tilt the motor to remove it from the water, Raise the tiller handle and rest it on a padded surface lower it and allow the cooling system to drain from face on its port side. Your Dealer should perform this corrosion spray to any surface subject to corrosion, service. Refer to Crankcase according to what your engine needs —. Refer to Flushing. Johnson Genuine Parts, or equivalent. Refer to Propeller to install the propeller. Portable fuel tank — Disconnect the hose from the tank. Refer to Changing oil is temporarily unavailable, you may use the Oil for acceptable substitute lubricants. ADJUSTMENTS 4 Hold a suitable container under the oil drain screw. Remove the screw and drain the re Throttle Friction

servior.<http://www.homesinpakistan.co.uk/magazine/uploadfiles/comfortmaker-thermostat-manual.xml>  
l

Before you reinstall the screw, re place the gasket with a new one. Reinstall the Adjust until a slight drag is felt when accelerating or screw and tighten it securely. If the breather and fuel WARNING line are damaged in any way, they must be re placed. See your Dealer. The ignition system presents a serious shock hazard. A strong impact WARNING can damage the hub and propeller blades. Damage to blades can cause unusual and excessive vibra To avoid accidental starting of engine while tion. Periodic maintenance contributes to the product's life span. The schedule should be adjusted according to operating conditions and use. Such overpowering can cause loss of your engine needs. Such notification is likewise necessary for your own safety even after expiration of the original warranty, since BRP US Inc. I have also received a copy of the Operator's Guide. It is your responsibility to provide references to bona fide sources. For a better experience, please enable JavaScript in your browser before proceeding. It may not display this or other websites correctly. You should upgrade or use an alternative browser. Model number J4REEA. Does anyone have a pdf version I could take a copy of or a hardcopy that could be put through a copier. Happy to recompense for time and money. Thanks, Phill Hes our resident outboard expert. If he hasnt got one, hell probably be able to give you a link. Manuals for 1996 and earlier are available from Ken Cook Co aka Outboardbooks.com At a price and often for a photocopy. They should be able to supply but I guess it ill not be cheap. The alternatives are to keep an eye open on eBay but an owners manual is not very likely to come up or hope someone can lend you one to photocopy. Nice little engines. Pretty straightforward. Pretty sure people on here will be able to answer most queries. Lakesailor has some in depth experience of these. Not dissimilar in many respects from my 6hp Evinrude I asked a similar question, and VicS was able to suggest a few links to information, but none was available for this particular model. Quite a lot of googling turned up some information, but no user manual unfortunately. Its very tidy and has been well looked after I want to carry that on. There is a outboard specilist company just over the road from the boat so I think I will take a wander over after Christmas and perhaps ask them to give it a service. I do have a few basic questions 1 Can I lie it on its side in a locker while sailing. If not, how do you transport an outboard while at sea 2 Do I need to drain the petrol out of it before I do lie it down. Or should I be looking at attach a remote tnk and then just run the engine till empty CAN you attach a remote to this engine 3 I am assuming a 501 2 stroke mix.

Anything else I should be thinking about Its very tidy and has been well looked after I want to carry that on. Anything else I should be thinking about Be sure the fuel tank vent is screwed down. This one has a combined choke and fuel tap control I believe. Make sure that is shut too. Allow all the water to drain and keep the power head a bit higher than the gearcase. 2. Provided the fuel tap and vent are shut and the cap fits properly there should be no need to drain the fuel. I believe this one can be fitted with a remote tank but only if there is a fuel pump and a connector for it. Use a TCW3 2stroke outboard oil. 4. There is a water pump impeller. They are often supplied as equivalents to the Champion Q series but they are not suitable. Your insurance may not be valid if you use a more powerful engine. Every year change the gear oil, or at least check for water ingress. Renew seals if any signs of water milky oil are found. Grease all grease nipples every year. Lightly grease or oil as appropriate all external moving parts. Clean fuel filter every year in line from the integral tank outlet. Part of the fuel pump when a pump is fitted. Dont store old fuel in the tank. Ditch it and make fresh every year. Flush in fresh water after use if possible. Yes but make sure it has completely drained all water out. 2 Do I need to drain the petrol out of it before I do lie it down. Not out of the tank but make sure you always run the engine to empty the carb before laying down. I think yours is the same as ours and has a built in tank and an optional socket for attaching remote. Clue is in the knob which selects built in or remote on front 3 I am assuming a 501 2 stroke mix. Correct but use biodegradable marine 2 stroke to be kind to the environment. 4 Am I right that there will be an impeller somewhere and that it will need changing each year. Not necessarily every year. We have had two years use between changes.

[wakingbeauty.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626bfd5457d3e---a-dyer-manual-jill-goodwin.pdf](http://wakingbeauty.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626bfd5457d3e---a-dyer-manual-jill-goodwin.pdf)

The key is to ensure there is a little water spraying out about half way up the leg. If not either have professionally changed or get a manual!!!! easy job if you know how. On our model which has a clutch it involves splitting the bottom of the leg. Only other servicing done regularly is to drain and refill gearbox oil We always flush our engine out after each use. Not had any problems with overheating. Only known weakpoint is the sealing of the water tube into the power head. If this

breaks down you get an overheated and or seized engine. 5 Am I right that I need to change the spark plug every year. No but I do! Blow the cost as a good spark gives reliable starting 6 I can see an anode on the foot which seems brand new do I need to change that each year. The model is about the same weight of most 2.5hp 2 strokes. Just go easy on the throttle. Anything else I should be thinking about They are very reliable. It is a twin cylinder engine which means they will tick over really quietly. Twins are much easier to start as one cylinder usually kicks up straight away with a very light pull. Also should a plug fail you can get home on one cylinder but a bit slower. You wont need a back support or deck crane to lift it on and off your dinghy. Remember to undo the tank vent before trying to start and close it before stowing away in a locker. Oh reverse is selected by twisting the engine through 180 But the slow running ability means you very rarely need reverse. Im planning to use it on the tender and for occasional trips up the river hamble, etc. So would not expect to run for more than a couple of hours at most. Do I need to carry a can in the dinghy or is a full tank enough Im planning to use it on the tender and for occasional trips up the river hamble, etc. Do I need to carry a can in the dinghy or is a full tank enough I guess its capacity is about 1 to 1.5 litres max. I would think you might get about an hour depending upon loading.

I think we got about 40 mins on a tank full but I am pushing a 1.5 tonne 24 trailer sailer at 5 knots. I would use an external tank in the front of the dinghy to help balance the lump at the back. If you have to take a spare can keep it and the filler funnel in a poly bag as it will then be free of dirt and water which could cause problems when refuelling. Im planning to use it on the tender and for occasional trips up the river hamble, etc. Do I need to carry a can in the dinghy or is a full tank enough Earlier models were 1.4 litres but this one may be smaller. 2 hours of running on a tankfull may be a bit optimistic so take a can of mixed fuel with you on the first few trips until you are able to make some sort of estimate of the range. Earlier models were 1.4 litres but this one may be smaller. Horse and Jockey, Curbridge I would copy the manual, but there are 31 pages. Model number J4REEA. Thanks, Phill Pretty similar to my 6hp and that will see me out I reckon. Pretty similar to my 6hp and that will see me out I reckon. I have been told that it must be laid down on one side only. Ive forgotten which so now I dont do it. I have been told that it must be laid down on one side only. Ive forgotten which so now I dont do it. It should not be laid on the gear shift lever. You can break it off. Id forgotten that despite the fact that it applies to my 6 hp and most others. Highly beneficial to have on hand. The book helped me quickly diagnose the problem and how to fix it. It certainly saved me a lot of money by making the repairs myself. The book was written well so that I understood the instructions and the pictures really helped identify the part I was trying to find. Had all the info I needed. Made easy sense of what was needed to make adjustments and repairs. I would recommend this book. It has sections of the manual dedicated to the electrical system, the fuel system, and too many sections to mention.

One very helpful feature is that it tells the factory specified part numbers for spark plugs, lower unit oil, etc. The only improvement that I would suggest is that it be more specific in the models covered, and not so many different engines be covered in one manual. Finding that many local mechanics flat out refuse to work on older motors, so doing self repairs, saving money, and learning about engine repair. Good book! Found a free manual on the internet. Too bad I didnt see that first. This manual is thorough and is designed for those who have mechanical knowledge but lack the experience. The author recognizes not all who buy this manual will be working at a marina but rather on their own boat. Even then there will still be gaps in information that must be filled by an actual mechanic who has experience with the unit in question. Seloc did a good job of providing basic information, they organize this manual better than some others. Most of what you will need to know can be readily found. Unfortunately some information is simply missing and some of the basic specifications were wrong. Thank you very much for the great pricing and service. My husband is very happy to be working on his boat we hope to finish repairs tomorrow. The information within was perfect for my needs and it arrived early. However, this does cover may main motor and kicker. Only had to buy 1

manual. The book helped me quickly diagnose the problem and how to fix it. The book was written well so that I understood the instructions and the pictures really helped identify the part I was trying to find. Found a free manual on the internet. Based on the radius, a new location list is generated for you to choose from. Motor starts every time and runs well. This boat will seat 4-6 people comfortably for a nice cruise around the lake. Also included are tow ropes, tube for recreational fun and all ropes included. Also some water skiing ropes.

The trailer is nothing special but is sturdy and all bearings were done 2 years ago. The crank is a bit crooked but gets the boat in the trailer every time. Selling this boat AS IS. It provides complete coverage on everything from basic maintenance to engine overhaul, featuring. If the ads up I'm still looking please send pictures of the motor. Contact either through kijiji or by text 7803604569. Please see photos for details. Message me with your needs and I will check if I have the items. Thanks for viewing! Under 20lbs can carry for miles it's so light! 2 stroke no reverse just twist and go. I have upsized to 4HP. Can be heard running. Upholstery is good for age. Seats 4. Has windshield and bimini top. Please be aware that the engine does not run. Has new starter and the lower leg is good. Great deal if someone needs parts. Trailer is not included in sale but could be used to transport boat if need be. Trailer could be negotiable with boat. Weighing just 30 pounds, the DF2.5 is the lightest Suzuki 4stroke motor ever built. Suzuki is also proud to note that the DF2.5 meets the rigorous EPA 2010 and CARB 3Star Ultra Low emissions standards. A 2.5 HP single cylinder OHV 4stroke engine, with 4.15 cu. in. displacement, generates plenty of power for small tenders and inflatables. It features easytopull recoil starting with. Motor runs great and has been all tested and tuned up. Can be heard running. Motor has good working power tilt and trim. Have all controls and wiring that can be negotiated. This boat has been fully updated with a new reinforced transom with stinger adjustable jack plate, 60 hp Johnson outboard, all new floors and carpet, brand new back to back lounge sun chairs, double marine batteries, safety kit, life jackets, brand new dock bumpers, and bilge pump. New battery, new coils, new fuel lines, new plugs, new prop. Comes with 2 props. Ready to hit the water. The motor start up good and runs. Has brand new spark plugs in. Put a new impeller in it.

Change the oil on it too. Motor is all clean and is water ready. Asking 2500 obo. For any more question and to come look at it text. 12042502537. Great for young boaters. Stable, easy to manoeuvre. Lots of fun for the starting out boater. In great condition. Over heated. Just rebuilt the lower end. New clutch dog. Impeller controls and all else is good. Lol still starts. Willing to part out or sell as unit. Power trim works good. Include gas tank. Pick up in Scarborough. Has one bad piston. Other than that everything else is in great shape. Throttle control is an older Whitney mark3. Good shape and comes with cables. Includes all the parts. Unfortunately powerhead has dropped a connecting rod bearing. Otherwise ran great. See list below along with picks for part details. No reasonable cash offer will be refused. This is a Suzuki outboard that was labeled for Johnson outboards. 25 inch shaft in nice shape. Big power for a big boat and priced right. It's missing the lid but runs like a dream. Comes with a tank as well. Call 705 3033976 TEXT ONLY at 613 5701833 or Email. Would like a 15hp or 20hp outboard motor as an upgrade any mercury, Johnson, evenrude, Suzuki, Yamaha, Chrysler. I'm located in Edmonton. Thanks To big for mine. Needs a starter and a tune up but can be heard running. Has pull start. Comes with gas tank. Learn more opens in a new window or tab This amount is subject to change until you make payment.
